## VERTECH ANNOUNCES MAJOR SERVICES AGREEMENT WITH WOODSIDE ENERGY

Vertech Group is extremely proud to announce the execution of a new, long term Major Services Agreement with Woodside Energy. This award sees Vertech continue our long-term relationship which commenced in 2011, culminating in the award of our first Major Services Agreement in 2014.

The contracted scope of work covers the services required by Woodside Energy including, but not limited to, Specialist Maintenance, Brownfields, Engineering, Turnaround Excellence, Projects, Subsea, Pipelines and Decommissioning works and commences on the 1st of July 2022.

The scope of work will incorporate the full suite of Vertech's inspection and access capabilities as well as drawing upon our group capabilities such as Geo Oceans subsea, Class and Remotely Operated Vehicle (ROVs) services, Blue Ocean Marine Services', Autonomous Underwater Vehicles (AUVs), the drone and digital twin solutions of AUAV, as well as the advanced inspection, Non-Intrusive Inspection and engineering capabilities of Sonomatic.

Managing Director Tom Brennan stated, "This is a testament to the great work the team has consistently delivered for Woodside which has seen us support the delivery of major Greenfield Projects such as the North Rankin B hook up and commissioning and the Pluto LNG construction, Brownfield projects including Greater Western Flank, Persephone, North Rankin A, Goodwyn Alpha derrick decommissioning, numerous flare replacements, along with our core integrity and inspection services on a number of assets in the Woodside Australia portfolio."

He further added, "I know the team are delighted to be able to continue to service Woodside and I look forward to seeing what we can achieve together over the years ahead."
